Notes to Condensed Consolidated Financial Statements

(Unaudited) June 30, 2003

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and six month periods ended June 30, 2003 are not necessarily indicative of the results that may be expected for the year ending December 31, 2003. For further information, refer to the consolidated financial statements and footnotes thereto included in the Forward Air Corporation Annual Report on Form 10-K for the year ended December 31, 2002.

The balance sheet at December 31, 2002 has been derived from the audited financial statements at that date, but does not include all of the financial information and footnotes required by accounting principles generally accepted in the United States for complete financial statements.

2. Employee Stock Options

The Company grants options for a fixed number of shares to employees with an exercise price equal to the fair value of the shares at the grant date. The Company accounts for employee stock option grants using the intrinsic value method in accordance with Accounting Principles Board ("APB") Opinion No. 25, Accounting for Stock Issued to Employees, and, accordingly, recognizes no compensation expense for the stock option grants. The Company follows the disclosure option of Statement of Financial Accounting Standards ("SFAS") No. 123, Accounting for Stock Based Compensation, as amended by SFAS No. 148, Accounting for Stock-Based Compensation-Transition and Disclosure, which requires that the information be disclosed as if the Company accounted for its stock options granted subsequent to December 31, 1994 under the fair value method.

Notes to Condensed Consolidated Financial Statements

2. Employee Stock Options (continued)

For purposes of pro forma disclosures, the estimated fair value of the stock options is amortized to expense over the options' vesting period. The Company's pro forma information follows (in thousands, except per share data):

3. Comprehensive Income

Comprehensive income includes any changes in the equity of the Company from transactions and other events and circumstances from non-owner sources. Comprehensive income for the quarter and six months ended June 30, 2003 was \$6.4 million and \$11.8 million, respectively, which includes \$37,000 in unrealized gains and \$47,000 in unrealized gains, respectively, on available-for-sale securities. Comprehensive income for the quarter and six months ended June 30, 2002 was \$5.4 million and \$10.3 million, respectively, which includes \$39,000 in unrealized gains and \$7,000 in unrealized gains, respectively, on available-for-sale securities.

Diluted income per share	\$ 0.29	\$ 0.24	\$ 0.54	\$ 0.46	

5. Income Taxes

For the three and six months ended June 30, 2003 and 2002, the effective income tax rate varied from the statutory federal income tax rate of 35% primarily as a result of the effect of state income taxes, net of the federal benefit, and permanent differences.

6. Commitments and Contingencies

The primary claims in the Company's business are workers' compensation, property damage, auto liability and medical benefits. Most of the Company's insurance coverage provides for self-insurance levels with primary and excess coverage which management believes is sufficient to adequately protect the Company from catastrophic claims. In the opinion of management, adequate provision has been made for all incurred claims up to the self-insured limits, including provision for estimated claims incurred but not reported.

The Company estimates its self-insurance loss exposure by evaluating the merits and circumstances surrounding individual known claims, and by performing hindsight analysis to determine an estimate of probable losses on claims incurred but not reported. Such losses could be realized immediately as the events underlying the claims have already occurred as of the balance sheet dates.

Notes to Condensed Consolidated Financial Statements

6. Commitments and Contingencies (continued)

Because of the uncertainty of the ultimate resolution of outstanding claims, as well as uncertainty regarding claims incurred but not reported, it is possible that management's provision for these losses could change materially in the near term. However, no estimate can currently be made of the range of additional loss that is at least reasonably possible.

7. Impact of Recently Issued Accounting Standards

In January 2003, the Financial Accounting Standards Board issued Interpretation No. 46, *Consolidation of Variable Interest Entities*. This interpretation of Accounting Research Bulletin No. 51, *Consolidated Financial Statements*, sets forth criteria under which a company must consolidate certain variable interest entities. Interpretation No. 46 places increased emphasis on controlling financial interests when determining if a company should consolidate a variable interest entity. The Company will adopt the provisions of Interpretation No. 46 during the third quarter of fiscal 2003 and does not anticipate adoption to materially impact the Company's consolidated financial statements.

SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity, issued in May 2003, is effective for financial instruments entered into or modified after May 31, 2003, and otherwise is effective at the beginning of the first interim period beginning after June 15, 2003. SFAS No. 150 establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. It requires that an issuer classify a financial instrument that is within its scope as a liability (or an asset in some circumstances). Many of these instruments were previously classified as equity. The Company does not anticipate SFAS No. 150 will materially impact the Company's financial position or results of operations.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Introduction

The Company provides scheduled ground transportation of cargo on a time-definite basis. As a result of the Company's established transportation schedule and network of terminals, its operating cost structure includes significant fixed costs. The Company's ability to improve its operating margins will depend on its ability to increase the volume of freight moving through its network.

Critical Accounting Policies

A summary of significant accounting policies is disclosed in Note 1 to the Consolidated Financial Statements included in the 2002 Annual Report on Form 10-K. Our critical accounting policies are further described under the caption "Discussion of Critical Accounting Policies" in Management's Discussion and Analysis of Financial Condition and Results of Operations in the 2002 Annual Report on Form 10-K. There have been no changes in the nature of our critical accounting policies or the application of those policies since December 31, 2002.

Three Months Ended June 30, 2003 compared to Three Months Ended June 30, 2002

Operating revenue increased by \$2.8 million, or 5.0%, to \$59.2 million in the second quarter of 2003 from \$56.4 million in the same period of 2002. This increase resulted from an increase in traditional linehaul revenue of \$2.2 million to \$50.2 million, a decrease in logistics revenue of \$0.1 million to \$4.7 million and an increase in other accessorial revenue of \$0.7 million to \$4.3 million. Traditional linehaul revenue was impacted by an increase in average weekly tonnage of 1.0% and a 3.8% increase in average revenue per pound including the effect of fuel surcharge versus the second quarter of 2002.

Purchased transportation represented 41.7% of operating revenue in the second quarter of 2003 compared to 43.3% in the same period of 2002. For the second quarter of 2003, traditional linehaul and logistics purchased transportation costs represented 40.5% and 70.3%, respectively, of operating revenue versus 42.4% and 62.3%, respectively, during the same period in 2002.

Salaries, wages and employee benefits were 22.7% of operating revenue in the second quarter of 2003 compared to 21.7% for the same period of 2002. The increase in salaries, wages and employee benefits as a percentage of operating revenue was attributed to a 0.6% increase in salaries and wages, including incentives, and a 0.4% increase in worker's compensation insurance and expenses.

Operating leases, the largest component of which is facility rent, were 5.6% of operating revenue in the second quarter of 2003 compared to 5.3% in the same period of 2002. The increase in operating leases as a percentage of operating revenue between periods was primarily attributable to an increase in facility rents and associated costs in connection with new leases and facilities in several key markets.

Depreciation and amortization expense as a percentage of operating revenue was 3.0% in the second quarter of 2003, compared to 3.3% in the same period of 2002. The decrease in depreciation and amortization expense as a percentage of operating revenue was primarily attributable to an increase in operating revenue and a decrease in depreciation expense from certain assets becoming fully depreciated.

Insurance and claims were 2.2% of operating revenue in the second quarter of 2003, compared to 2.6% in the same period of 2002. The decrease in insurance and claims as a percentage of operating revenue resulted, in part, from an increase in operating revenue during the quarter and a slight decrease in claims expenses versus 2002 which was offset, in part, by an increase in premiums during the quarter.

Other operating expenses were 7.9% of operating revenue in the second quarter of 2003 compared to 8.7% in the same period of 2002. The decrease in other operating expenses as a percentage of operating revenue was attributable to a 0.5% decrease in miscellaneous operating expenses, including a decrease in bad debt expense and a 0.1% decrease in communication and utility expenses.

Income from operations increased by \$1.5 million, or 17.6%, to \$10.0 million for the second quarter of 2003 compared with \$8.5 million for the same period in 2002. The increase in income from operations was primarily a result of the increase in operating revenue, including fuel surcharge, which was offset by an increase in operating costs associated with operating the network.

Interest expense was \$18,000, or less than 0.1% of operating revenue, in the second quarter of 2003, compared with \$94,000, or 0.2%, for the same period in 2002. The decrease in interest expense was attributed to lower average net borrowings during the period.

Other income, net was \$160,000, or 0.3% of operating revenue, in the second quarter of 2003, compared to \$229,000, or 0.4%, for the same period in 2002. The decrease in other income, net resulted from lower interest income attributed to lower yields on higher balances in both cash and cash equivalents and available-for-sale securities during the second quarter of 2002.

The combined federal and state effective tax rate for the second quarter of 2003 was 37.5% compared to a rate of 38.0% for the same period in 2002, primarily as a result of tax planning strategies at the state level.

As a result of the foregoing factors, net income increased by \$1.0 million, or 18.9%, to \$6.3 million for the second quarter of 2003, compared to \$5.3 million for the same period in 2002.

Six Months Ended June 30, 2003 compared to Six Months Ended June 30, 2002

Operating revenue increased by \$6.5 million, or 5.9%, to \$115.8 million in the first six months of 2003 from \$109.3 million in the same period of 2002. This increase resulted from an increase in traditional linehaul revenue of \$5.3 million to \$98.7 million, an increase in logistics revenue of \$0.4 million to \$9.3 million and an increase in other accessorial revenue of \$0.8 million to \$7.8 million. Traditional linehaul revenue was impacted by an increase in average weekly tonnage of 4.1% and a 1.6% increase in average revenue per pound including the effect of fuel surcharge versus the first six months of 2002.

Purchased transportation represented 42.0% of operating revenue in the first six months of 2003 compared to 42.8% in the same period of 2002. For the first six months of 2003, traditional linehaul and logistics purchased transportation costs represented 40.4% and 71.0%, respectively, of operating revenue versus 42.0% and 62.8%, respectively, during the same period in 2002.

Salaries, wages and employee benefits were 22.8% of operating revenue in the first six months of 2003 compared to 22.1% for the same period of 2002. The increase in salaries, wages and employee benefits as a percentage of operating revenue was attributed to a 0.4% increase in salaries and wages, including incentives, and a 0.3% increase in worker's compensation insurance and expenses.

Operating leases, the largest component of which is facility rent, were 5.5% of operating revenue in the first six months of 2003 compared to 5.5% in the same period of 2002. While operating

leases as a percentage of operating revenue remained flat between periods, the dollar amount increased from an increase in facility rents and associated costs in connection with new leases and facilities in several key markets.

Depreciation and amortization expense as a percentage of operating revenue was 3.1% in the first six months of 2003, compared to 3.4% in the same period of 2002. The decrease in depreciation and amortization expense as a percentage of operating revenue was primarily attributable to an increase in operating revenue and a decrease in depreciation expense from certain assets becoming fully depreciated.

Insurance and claims were 2.3% of operating revenue in the first six months of 2003, compared to 2.6% in the same period of 2002. The decrease in insurance and claims as a percentage of operating revenue resulted, in part, from an increase in operating revenue during the period and a decrease in claims expenses versus 2002 which was offset by a slight increase in insurance premiums during the first six months.

Other operating expenses were 8.3% of operating revenue in the first six months of 2003 compared to 8.7% in the same period of 2002. The decrease in other operating expenses as a percentage of operating revenue was attributable to a 0.4% decrease in miscellaneous operating expenses, including a decrease in bad debt expense and a 0.1% decrease in communication and utility expenses which was offset by a 0.1% increase in equipment repair and maintenance.

Income from operations increased by \$2.3 million, or 14.1%, to \$18.6 million for the first six months of 2003 compared with \$16.3 million for the same period in 2002. The increase in income from operations was primarily a result of the increase in operating revenue, including fuel surcharge, which was offset by an increase in operating costs associated with operating the network.

Interest expense was \$39,000, or less than 0.1% of operating revenue, in the first six months of 2003, compared with \$196,000, or 0.2%, for the same period in 2002. The decrease in interest expense was attributed to lower average net borrowings during the period.

Other income, net was \$307,000, or 0.3% of operating revenue, in the first six months of 2003, compared to \$439,000, or 0.4%, for the same period in 2002. The decrease in other income, net resulted from lower interest income attributed to lower yields on higher balances in both cash and cash equivalents and available-for-sale securities during the first six months of 2002.

The combined federal and state effective tax rate for the first six months of 2003 was 37.5% compared to a rate of 38.0% for the same period in 2002, primarily as a result of tax planning strategies at the state level.

As a result of the foregoing factors, net income increased by \$1.6 million, or 15.7%, to \$11.8 million for the first six months of 2003, compared to \$10.2 million for the same period in 2002.

Liquidity and Capital Resources

The Company has historically financed its working capital needs, including capital purchases, with cash flows from operations and borrowings under the Company's bank lines of credit. Net cash provided by operating activities totaled approximately \$14.5 million for the six months ended June 30, 2003, compared with \$12.1 million in the same period of 2002.

Net cash provided by investing activities was approximately \$12.3 million for the six months ended June 30, 2003 compared with \$3.9 million used in investing activities in the same period of 2002. Investing activities consisted primarily of the purchase and sale or maturities of available-for-sale securities and the purchase of operating equipment and management information systems during the six months ended June 30, 2003.

Net cash provided by financing activities totaled approximately \$352,000 for the six months ended June 30, 2003 compared with approximately \$543,000 for the same period of 2002. Financing activities included the repayment of long-term debt and capital leases, proceeds received from the exercise of stock options and common stock issued under the employee stock purchase plan.

The Company's credit facility consists of a working capital line of credit. As long as the Company complies with the financial covenants and ratios, the credit facility permits it to borrow up to \$20.0 million less the amount of any outstanding letters of credit. Interest rates for advances under the facility vary based on how the Company's performance measures against covenants related to total indebtedness, cash flows, results of operations and other ratios. The facility bears interest at LIBOR plus 1.0% to 1.9%, expires in April 2004 and is unsecured. At June 30, 2003, the Company had \$-0- outstanding under the line of credit facility and had utilized \$4.9 million of availability for outstanding letters of credit. The Company was in compliance with the financial covenants and ratios under the credit facility at June 30, 2003.

On July 25, 2002, the Company announced that its Board of Directors approved a stock repurchase program for up to 2,000,000 shares of the Company's common stock. The Company expects to fund the repurchases of its common stock from its cash and cash equivalents and available-for-sale securities and cash generated from operating activities. The Company did not repurchase any of its shares during the first or second quarter of 2003. Since inception, the Company has repurchased 629,000 shares of the Company's common stock for \$12.1 million for an average purchase price of \$19.20 per share.

Management believes that its available cash, investments, expected cash generated from future operations and borrowings under available credit facilities will be sufficient to satisfy the Company's anticipated cash needs for at least the next twelve months.

Forward-Looking Statements

This report contains statements with respect to the Company's beliefs and expectations of the outcomes of future events that are forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. Written forward-looking statements may appear in documents

filed with the Securities and Exchange Commission, in press releases and in reports to shareholders. Oral forward-looking statements may be made by the Company's executive officers and directors on behalf of the Company to the press, potential investors, securities analysts and others. The Private Securities Litigation Reform Act of 1995 contains a safe harbor for forward-looking statements. The Company relies on this safe harbor in making such disclosures. In connection with this safe harbor provision, the Company is hereby identifying important factors that could cause actual results to differ materially from those contained in any forward-looking statement made by or on behalf of the Company in this report. Without limitation, factors that might cause such a difference include economic factors such as recessions, inflation, higher interest rates and downturns in customer business cycles, fears over the threat of, and actual occurrence of, war and terrorism, the Company's inability to maintain its historical growth rate because of a decreased volume of freight moving through the Company's network, increasing competition and pricing pressure, surplus inventories, loss of a major customer, the creditworthiness of the Company's customers and their ability to pay for services rendered, the Company's ability to secure terminal facilities in desirable locations at reasonable rates, the inability of the Company's information systems to handle an increased volume of freight moving through its network, changes in fuel prices, employment matters including rising health care costs, enforcement of and changes in governmental regulations, environmental and tax matters, the handling of hazardous materials, and the availability and compensation of qualified independent owner-operators needed to serve the Company's transportation needs. As a result of the foregoing, no assurance can be given as to future financial condition, cash flows, or results of operations. Forward-looking statements can be identified by words such as "expects," "anticipates," "intends," "plans," "believes," "estimates," "projects," and similar expressions. The Company does not undertake any obligation to update or to release publicly any revisions to forward-looking statements contained in this report to reflect events or circumstances occurring after the date of this report or to reflect the occurrence of unanticipated events.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company's exposure to market risk related to debt and available-for-sale securities is not significant and has not changed materially since December 31, 2002.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of June 30, 2003, the principal executive officer and principal financial officer of the Company, under the supervision and with the participation of the Company's management, have evaluated the disclosure controls and procedures of the Company as defined in Exchange Act Rule 13(a)-14(c) and have determined that such controls and procedures are effective.

Part II. Other Information

Item 1. Legal Proceedings

The Company is, from time to time, a party to litigation arising in the normal course of its business, most of which involve claims for personal injury and property damage incurred in connection with the transportation of freight. Management believes that none of these actions, individually or in the aggregate, will have a material adverse effect on the financial condition or results of operations of the Company.

Item 2. Changes in Securities and Use of Proceeds
